WOA abilities

Notable projects

WOA IS A FULLY CLOUD BASED SYSTEM RUN ON AWS, AMAZON WEB SERVICES - POWERED BY MULTIPLE FEEDS FROM A VARIETY OF SERVICES SUCH AS BLOOMBERG PROFESSIONAL

Bloomberg

WOA project 1

WOA Technology is able, over time, to predict, with a high degree of accuracy, market turns. The most important benefit for this capability is to consistently produce profitable outcomes.

Cloud based via Amazon Web Services, WOA is able to connect to any account world wide and to be remotely controlled and monitored.

WOA project 2

Constant monitoring and maintenance by WOA. Benefits of this are immense - WOA is a full service engineered platform.

WOA project 3

CONNECTIVITY

Monitor results via a computer, smart phone, even an **iWatch**.

EMAIL UPDATES

Monitor results by receiving constant updates via email.

TRANSPARENCY

Monitor a wide variety of data results on a client's account via daily reports.

WOA project 4

WOA team of financial engineers monitors all client accounts in real time to assure everything is running smoothly.

WOA PROJECT 5

Clients have the ability to open accounts with no-preset lock up periods.

WOA tech

Artificial Intelligence & Machine Learning
are at the cornerstone and driver of WOA

WOA co-location

WOA is run through a number of hubs to co-locate a client's account to maximise the fastest possible connection for entry and exit points in trading. Bloomberg Professional Services, among others, is deployed to assure the optimal in quality control.

What is WOA?

WOA is a high precision machine learning, trading system created by the developer of WOA, Donald Beaudry, in conjunction with Google's Tensorflow.

What Question Should an Investor Always Ask?

Most investors and traders ask - how much can I make? The question should be - how much can I lose? What are the risks associated with making X amount? In WOA we have been able to achieve a sharp ratio of 3.2 since 2019.

WOA is designed to trade on client accounts which can either be for an individual, business or fund. WOA is also designed for wealth creation - medium, as well as long term investments, retirement planning and both conservative and aggressive investing.

How are these returns possible?

Building out an overall profitable model like WOA, that continuously over time produces positive returns, is extremely challenging on many levels. In fact, until the past few years, existing technology was such that what we can now do was not even possible then.

With the vast recent improvement in technology and computational power and with tools such as machine learning, a sub-category of artificial intelligence, WOA has been able to break down certain impossibilities in trading. The end result is what I call the God Particle - the ability to see what has never been able to be seen in the markets before now.

These technological advancements, in my opinion, have led to an absolute explosion of opportunity in trading in the past few years. As a result, this may be the first time a truly risk-adverse, overall profitable model on a scale like WOA has ever been achieved.

How Does This Work

WOA currently works with some of the most prestigious brokerages with offices - in New York, London & Hong Kong.

Account opening is straight forward and simple. Once an account is open and funded, WOA can begin trading around 2-4 weeks after WOA is connected to the client account.

All accounts are fully transparent and every client will have their own individual account held in their own name. WOA will only have the ability to trade on the client's account with no pre-set lock up period of any kind. WOA is paid a commission quarterly the net profits of the accounts performance.

Key Points>Every client has their own account, in their own name, fully under their control at all times, directly with the brokerage.

WOA

key points

>WOA is a machine learning trading system that has the proven track record to produce overall consistently profitable returns.

>WOA uses a high-water-mark system.

>WOA is able to run on client accounts which are high net worth individuals, businesses and funds, including US clients.

>WOA Fees

-No account opening fee, No management fee.

>WOA system x2.0

Deep Industry Knowledge

Producing consistently profitable returns is no small task. Although past successes are no guarantee of future results, we believe our state of the art technology utilizing machine learning (ML), artificial intelligence (Ai) and advanced computer technology gives us, and our clients, an unparalleled opportunity to continue to succeed in the world of trading.

Years of Experience

The developer of WOA, Donald Beaudry, has been in different aspects of the trading business for over 2 decades. He is a highly experienced quant and financial engineer who has experience in Ai, ML systems architecture in the financial markets and the building out of trading systems.
