

# Breakthrough Technologies WOA

Exciting innovations that can change the world

[WWW.WOA.TECHNOLOGY](http://WWW.WOA.TECHNOLOGY)

These exciting new inventions  
present endless possibilities  
of how technology can shape  
the future for the better.

WOA Ai\_ Machine Learning

Integrated Trading Technology

# ADVANCED ARTIFICIAL INTELLIGENCE

WOA  
AI ML  
AUTOMATED  
TRADING

CONSERVATIVE, ASYMMETRICAL,  
RISK ADVERSE AND OVERALL  
PROFITABLE TRADING RESULTS  
ARE THE CORNERSTONE OF WOA.

WOA ALSO USES CLOUD SERVICE  
COMPUTATIONAL POWER TO  
MAXIMIZE PROFITABLE RETURNS  
WITH DE MINIMUS DOWNSIDE  
RISK.

WOA is a high precision machine learning, trading system created by the developer of WOA, Donald Beaudry, in conjunction with Google's TensorFlow.

TensorFlow is a open-sourced software library for dataflow and cross optimization benefits. Written in Python, C++ and CUDA, TensorFlow is deployed to help build and and maximize WOA efficiency and profitability.

GENERATION

# What Question Should an Investor Always Ask?

Most investors and traders ask - how much can I make? The question should be - how much can I lose? What are the risks associated with making X amount? In WOA we have been able to achieve a sharp ratio of 3.2 since 2019. WOA is designed to trade on client accounts which can either be for an individual, business or fund. WOA is also designed for wealth creation short or long term, conservative or aggressive - medium, as well as retirement planning is also an available choice.

A large green triangle is positioned in the top-left corner of the slide. A large blue circle is positioned in the bottom-left corner, partially overlapping the green triangle.

# WOA DEFAULT MODEL SHARP RATIO 3.2

How are these returns possible?

Building out an overall profitable model like WOA that continuously over time produces positive returns is extremely challenging. In fact, until the past few years, existing technology was such that what we can now do was not even possible then.

With the vast recent improvement in technology and computational power, and with tools such as machine learning, a sub-category of artificial intelligence, WOA has been able to break down certain heretofore impossibilities in trading. The end result is what I call the God Particle - the ability to see what has never been able to be seen in the markets before now.

These technological advancements, in my opinion, have led to an absolute explosion of opportunity in trading in the past few years. As a result, this may be the first time a truly risk-adverse, overall profitable model on a scale like WOA has ever been achieved.

# WOA

# TECHNICAL TEAM

WOA Tech Team is headed by Donald Beaudry,  
[Senior Developer & Architect of WOA.](#)

WOA consists of 5 remote working team members who bring a variety of skill sets to the WOA platform. These skill sets range from various computer programming backgrounds to advanced coding, quant trading and strategy building, Ai\_ & ML engineering to advanced game theory strategists.

Additional skill sets of our team are strategic game theory, military simulations, statistical randomness, and probability analysis. These skill sets led by Donald Beaudry make up the fabric and model which is WOA, War of Attrition.

WOA's technical team members range in age from 17 to 30's and are from diverse and international backgrouns and locations.
